Muhammad Rizwan

Software Engineer | Backend-Focused Full Stack & Mobile Developer
Lahore, Pakistan | +92 300 0795296 | muhammadrizwaneng@gmail.com | linkedin.com/in/muhammad-rizwan-fullstack
github.com/muhammadrizwaneng

PROFESSIONAL SUMMARY

Software Engineer with 4+ years of experience building secure, scalable backends and cross-platform mobile apps with Node.js, Next.js, Python (FastAPI, Flask), and React Native. Delivered SSO, MFA, and search platforms for 15,000+ users on AWS Serverless and shipped 5+ apps to Google Play and the App Store. Strong in system design, collaboration, and mentoring, using Cursor, Claude, and AI agents.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL
Backend: Node.js, Express.js, FastAPI, Flask, REST APIs, Microservices, JWT, OAuth, SSO, MFA, Swagger
Frontend & Mobile: React.js, Next.js, React Native, Tailwind CSS, HTML, CSS
Databases: MongoDB, PostgreSQL, MySQL, Elasticsearch | **Cloud:** AWS, Serverless, Azure, Docker, CI/CD, Git
AI & Machine Learning: LLM Integrations, OpenAI API, NLP, BERT, Random Forest, QLoRA, Hugging Face
AI Tools & Practices: Cursor, Claude, Prompt Engineering, AI Agents, Agile/Scrum, Code Review, System Design

PROFESSIONAL EXPERIENCE

Software Engineer **July 2022 – Present**
SeeBiz PVT LTD *Lahore, Pakistan*

- Architected an enterprise SSO platform with Node.js and Next.js on AWS Serverless for 15,000+ active users.
- Engineered MFA and cryptographic account workflows, reducing unauthorized access attempts by 99.9%.
- Integrated Elasticsearch for admin search and audit trails, cutting search query latency by 40%.
- Migrated legacy backends to serverless, reducing cloud costs by 30% and speeding up deployments by 25%.
- Developed Flask, FastAPI, and MongoDB REST APIs for mobile products with sub-200ms response times.
- Launched 4 React Native apps on Google Play and the App Store: SeeCard, SeeTask, SeeBiz, and Krub.ai.
- Accelerated feature delivery with Cursor and Claude using custom project rules plus QA and backend AI agents.
- Led code reviews and mentored junior developers on code quality, performance, and maintainability.

Software Engineer Intern **January 2022 – June 2022**
SeeBiz PVT LTD *Lahore, Pakistan*

- Designed 10+ database schemas and scalable backends using MySQL and MongoDB.
- Implemented JWT authentication and input validation across 5+ microservices.
- Collaborated in Agile sprints on integration and debugging, maintaining 99.9% uptime during releases.

PROJECTS

Turnfeat Platform - AI Freelance Marketplace
Technologies Used: React Native, Node.js, PostgreSQL, OpenAI

- Built a React Native freelance marketplace with job posting, bidding, and milestone tracking; live on Google Play.
- Developed a Node.js and PostgreSQL backend for escrow payments, contracts, and milestone releases.
- Integrated OpenAI to power AI skill matching between clients and freelancers.

PAKEZY Tourism Ecosystem - Regional Travel App
Technologies Used: React Native, FastAPI, MongoDB, Maps

- Built a React Native travel app for discovering destinations and planning trips; published on Google Play.
- Engineered FastAPI and MongoDB geo-spatial APIs for location search and nearby-place queries.
- Designed map microservices to keep location features fast and independently scalable.

AI Predictive Sales Analytics - Forecasting & Semantic Search
Technologies Used: Python, BERT, TAPAS, Random Forest, Pandas

- Built a Random Forest demand forecasting model to predict product sales from historical data.
- Fine-tuned BERT for semantic product search and TAPAS for natural-language questions over sales tables.
- Designed ETL pipelines and data models to clean and prepare sales data for training and analysis.

EDUCATION & TRAINING

Bachelor of Science in Software Engineering **2017 – 2021**
Gomal University *D.I. Khan, Pakistan*

Artificial Intelligence (Machine Learning & Deep Learning) - Professional Training **2024 – 2025**
Neural networks, CNNs (VGG, ResNet-50), NLP, feature engineering, Azure ML
